## **Leitz EdgeExpert Series – Faster, More Durable Tooling**

**Grand Rapids, MI** – Leitz EdgeExpert series features proprietary high-shear knife geometry. This design drastically reduces cutting force, optimizing quality and greatly enhancing tool productivity and durability.

Traditional tooling utilizes aggressive, chiseling cutting action which damages both the material and the tool. The unique engineering of the EdgeExpert line slices through material with ease. You will see both performance and quality improvements as a result.

EdgeExpert tooling is available in EdgeExpert Plus and EdgeExpert Pro designs. The tool which is right for your operation depends on the batch size and material being cut.

Leitz, with U.S. operations headquartered in Grand Rapids, MI, and worldwide operations managed from Oberkochen, Germany, is a leader in high-technology engineering and manufacturing of precision tooling and systems for machining wood, plastics and advanced composites. In addition to Grand Rapids, the company has U.S. service centers in Archdale, NC, Garland, TX, San Bernardino, CA and Kent, WA.
